

August 21, 2009

Mr. Mark Mason
Director of Financial Services
City of Cape Coral
PO Box 150027
Cape Coral, FL, 33915-0027

Re: Additional UEP Scenario Based Upon FY 2009 Water, Sewer & Irrigation Revenue Sufficiency Analysis – Final Report

Dear Mr. Mason:

This letter and corresponding schedules are intended to present the impacts of an additional Utility Expansion Program (UEP) scenario based upon the data and assumptions as contained within the FY 2009 Water, Sewer & Irrigation Revenue Sufficiency Analysis Final Report dated March 23, 2009 (Final Report).

The additional UEP scenario is based upon the same fundamental data and assumptions as presented in the Final Report (notably the information presented within Appendix A). However, the additional UEP scenario includes additional water, sewer, and irrigation revenue growth from assumed new connections as well as Capital Facility Expansion Charge revenue from all parcels in the Southwest Areas 6-7 as shown on the FY 2007 Utility Expansion Plan Map included in Appendix A of the Final Report. The assumed new connections by year for this new scenario have been included with this letter as Schedule 1, consistent with the presentation of new connections in Appendix A of the Final Report.

The basis for collecting the Capital Facility Expansion Charge from all parcels in this UEP area is that new/expanded facilities are sized based upon the total build-out of the new utility expansion area, not just those taking service immediately upon its availability. As such, even though certain parcels may not have been developed yet, the city has invested in the facilities that will be utilized to serve them once the parcels are developed. By receiving these prepaid capital expansion fees now, as opposed to the when new units are ultimately developed on these properties in the future, allows the City to reduce its near-term borrowing requirements, thus reducing the amount of rate adjustments required in the utility fees to all customers.

It is important to note that this additional UEP Scenario reflecting the expansion of all utility services into Southwest Areas 6-7 continues to reflect the same general plan of finance as presented in the Final Report. Specifically, this new UEP scenario continues to assume a bond anticipation note is issued in 2009 for proceeds of \$75 million at an estimated interest rate of 6% in order to free up \$75 million in commercial paper that will be used to complete the Utility's treatment plant expansion program. Subsequently, this note will be replaced with

a \$84.2 million bond (which includes a \$8.4 million debt service reserve fund) at an estimated 7% interest rate in FY 2011 and an additional \$162.5 million bond (including \$16.2 million in debt service reserve) at an estimated 7% interest rate will be issued in FY 2012 to refund the remaining commercial paper for the plant expansions and fund certain other CIP projects. A complete set of schedules containing the supporting financial analysis and results for this additional scenario are included with this letter (as were included for each financial management plan or scenario identified in the Final Report in Appendices B - D).

Below are summary tables of the annual rate increases for each of the scenarios included in the Final Report as well as for the new UEP scenario. As one would expect, while the new UEP scenario does not result in as low of rate increases as either of the UEP scenarios included in the Final Report, it does result in lower rate adjustments than would be required if the entire UEP was put on hold.
